

Rosanna Degani Young Investigator Award

Computing in Cardiology 2014 was proud to host the twenty second Rosanna Degani Young Investigator Competition. Rosanna Degani was a pioneer in the field of electrocardiology from the Institute for Research on System Dynamics & Bioengineering in Padova and Chairperson of the Organizing Committee of the 18th Computers in Cardiology Conference in Venice, September 1991. In her memory the Venice Local Organizing Committee and the Board of Directors of Computing in Cardiology established this award, whose purposes are to encourage young investigators and to provide a living memorial to Rosanna Degani.

On the basis of written manuscripts submitted before the meeting, four finalists were invited to Boston as guests of the Conference to present their research during the opening plenary session. All finalists were given an opportunity to answer questions on their research. The presentations and research papers were judged by a panel of experts.

The winner of the 2014 Rosanna Degani Young Investigator competition was Matthijs JM Cluitmans, from Maastricht University, Maastricht, The Netherlands. The manuscript *"Physiology-based Regularization Improves Noninvasive Reconstruction and Localization of Cardiac Electrical Activity"* can be found on page 1 of the proceedings.

Gary and Bill Sanders Poster Awards

The 2014 conference presented the eighteenth annual Poster Awards, donated and presented by Bill and Gary Sanders. Bill is a Past President of Computers in Cardiology. The six winners this year were Fernando Andreotti, Digna M González-Otero, Gustavo Lenis, Ana Mincholé, Leila Mirmohamadsadeghi, and Martin Rauber.
